The period of incubatios in human bengs is about 21 days. If the mad dog bit other persons in Juarez no report has been made to the authorities. Close watch will be kept on the many dogs of the city, and if necessary a general massacre will follow.

The horrible death at Hotel Dieu about two weeks ago of the Tarango poy, has left an impression of horror. Heat and lack of accessible water for dogs' consumption, is partially blamed. Dryness of the river affords practically no drinking place for the homeless
